Subject: Hunters Pt Naval Shipyard - Tetra Tech concerns

Dear Lyndsey,

John Chesnutt told me he talked with you today. I appreciate very much your kind offer to help. I met you when you gave a training in R9 for the Navajo group. I appreciated your clear and informed presentations. Thank you also for being so friendly, warm, and helpful to us newcomers to the rad world.

I am at the NARPM conference right now, but I will try to call you during a break. In the mean time, attached is some background about the Tetra Tech rad issues we're dealing with. I suggest reading in this order:

1. NBC Response 3-25
2. Tetra Tech Choice – NRC Notice of Apparent Violation (start with page 6 of the pdf)
3. Contractor Submitted False Radiation Data – NBC TV news aired 3-10. You can go online to watch the video version: <http://www.nbcbayarea.com/investigations/Former-Hunters-Point-Worker-Claims-Supervisors-Ordered-Him-to-Hide-Radiation-371723561.html>
4. Investigation Exec Sum

The rest are more details, but the above should give you a quick intro to what we're looking at.

My first priority is to evaluate potential risk to trench workers, tenants working onsite, neighborhood residents, and groundwater.

Separately, I'll send you background information about EJ Task Force concerns.

Thank you again!

- Lily
